Overview

Get the "bigger picture" with 2 megapixel resolution, high speed, and smear-free "Global Shutter" imaging in this small, robust camera.

The Falcon 2M30 area scan camera is ideal for electronics manufacturing inspection, industrial metrology, and traffic management.

The camera uses a 2 megapixel (1600 x 1200 or 1920 x 1080) interline transfer sensor capable of running at up to 34 frames per second (higher with windowing) and features electronic global shuttering for smear free imaging of fast moving objects. These features allow for a large field of view, no smear effect, and high throughput.

The Falcon 2M30 offers programmable features and diagnostics accessible through the Camera Link™ MDR26 connector. The camera's small body and robustness make it perfect for the wear and tear of industrial environments.
